32" Smart Portable TV (Standbyme Machine) Description

I.

Description of product background and application scenarios

Scenarios: indoor living room, bedroom, kitchen or study, as well as outdoor picnics, camping, etc., can free your hands, anytime and anywhere to use the smart screen for catching up on TV shows, playing games, meetings, online classes and other activities.

Product value: to solve the problem of many people use the phone to watch a play, watch a movie or watch a fitness video will be too small due to the phone screen is not good, or the organization of the use of large-screen screen casting location is fixed. 1080P large-screen view is better, the attribute of the mobile can be in the sofa, bed, kitchen, and even outdoor scenes, can be carried out activities, a very good solution to the above pain points.

ii. product characteristics

- High-definition large-screen display effect.
- High screen-to-body ratio display, ultra-high-definition visual experience.
- High-performance 8-core processor.
- Super fast charging, 4-5h battery life.
- Concealed universal wheel design, easy to move.
- Rotating stand, support horizontal/vertical screen, adjust the angle at will.

iii. product specification sheets

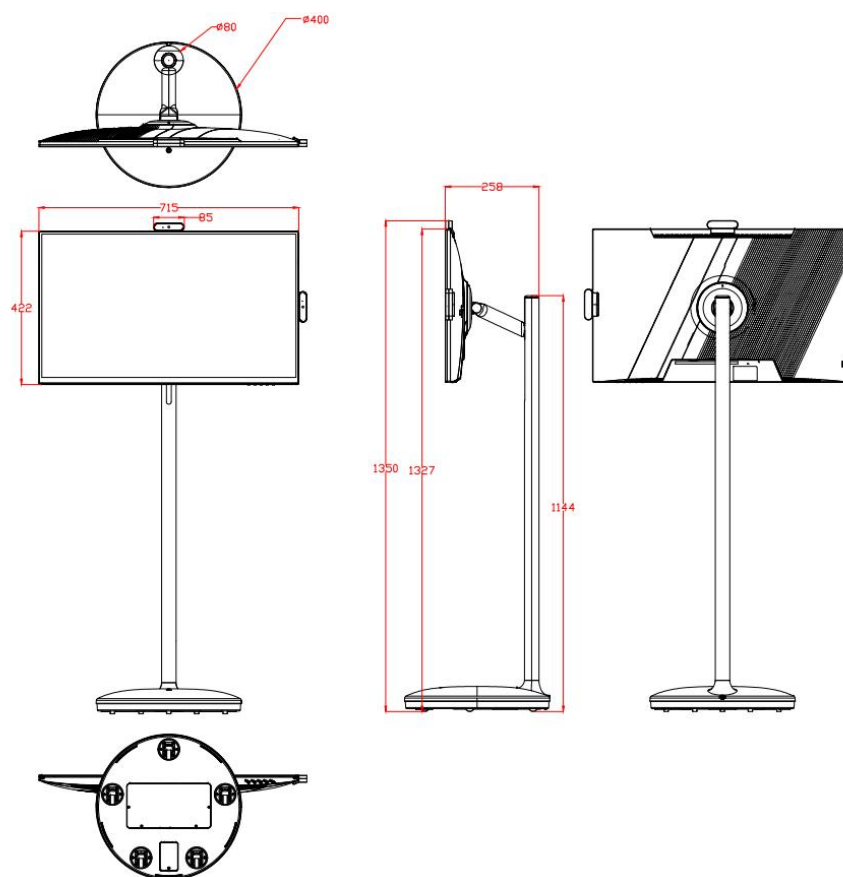

32-inch boudoir machine		
Product Model Number		
Screen	Dimensions	32" 16:9
	Resolution	1920*1080
Basic Specifications	operating systems	Android13
	Processor	RK3576 /RK3588
	Memory	4GB LPDDR4 32GB EMMC Capacity optional
	equipment power supply	19V5A
	equipment power consumption	≤38W
	relative humidity	10%~90%
	Operating Temperature	0°C~40°C
	storage temperature	-20°C~60°C
	the environment in which it is used	Indoor
	external interface	USB3.0 Type A* 2

		TYPE-C OTG*1
		RJ45 Gigabit Ethernet port*1
		DC IN*1
		3.5mm headphone port, support for headset as a whole
		HDMI IN up to 4K 60fps
		TF, SIM card holder
	Speakers	8Ω5W*2
Basic parameters	WIFI	2.4G/5G Support WIFI6
	Bluetooth	Supports Bluetooth 5.0
	Camera	200W external magnetic camera
	Web port	RJ45 Gigabit Ethernet port
	TF card	Support
	4G	Optional
	Microphone	Optional

VI. installation considerations

1. The actual wiring, if the host of the 19V power supply line does not use a "special power extension cord" and the distance is long, resulting in the cable equivalent resistance is too large, it is easy to terminate the voltage is not enough ($\leq 12V$), the host repeatedly reboot, crash and other abnormal phenomena.
2. The installation environment should never be humid, and avoid strong electricity and strong electromagnetic fields. Such as electromagnetic appliances, cell phones and other appliances that can be moved at will should be as far away from the equipment as possible.
3. This product is a precision device, avoid collision, drop, vibration, so as to avoid the main board components fall off or internal damage to the camera, resulting in functional problems or performance problems.
4. When the display is assembled, the connection cable cannot be hot-swapped.
